

Get the facts about COVID-19 vaccines

We understand that making the decision to get the COVID-19 vaccine may be an important one for you and your family.

COVID-19 vaccines provide your body's immune system with instructions to help identify and fight off the virus if you are exposed to it. The vaccines work with your body's natural defense system to help develop protection against COVID-19.

- ✓ Getting the COVID-19 vaccine will reduce your risk of getting COVID-19 and passing it on to others who may become very sick.
- ✓ If you do get infected with COVID-19, getting the COVID-19 vaccine will reduce your risk of severe illness and help make your symptoms milder.
- ✓ The protection you get from the COVID-19 vaccine will help to reduce absences from work, school and childcare.

Get the facts about COVID-19 vaccines

Vaccination is one of the best ways to protect your health, and the health of your family. By getting vaccinated, you will help to prevent COVID-19 cases, hospitalizations and deaths in our communities.

If you would like more information or have questions about the COVID-19 vaccine, please talk to your healthcare provider or contact us at shots@mlhu.on.ca or call **519-663-5317** and ask to speak to a Nurse with the Vaccine Preventable Diseases Team.
