## Neonatal Abstinence Syndrome – Effects of Parental Opiate Use on Child Developmental Outcomes – Preconception, Prenatal and Early Years

**October 21<sup>st</sup>, 2015**

12:30 pm-4:30 pm

The BMO Centre London,  
295 Rectory St., London, ON,

**3.0 Mainpro-C credits**

**THE MIDDLESEX-LONDON COMMUNITY EARLY  
YEARS HEALTH CARE PROVIDER CHAMPION  
COMMITTEE**

*This **Mainpro**<sup>®</sup> **C** interactive workshop will provide participants with a deeper understanding of the impact of parental opiate use on child developmental outcomes.*

### **Learning Objectives**

1. Participants will become familiar with the latest research findings regarding the long-term and short-term effects of parental opiate use on children
2. Participants will become familiar with substance use screening strategies that can be used universally for people during the preconception, prenatal and early years
3. Participants will become familiar with harm reduction strategies that can be used when dealing with opiate users during the preconception, prenatal and early years periods
4. Participants will become familiar with local community services available to support people using opiates during the preconception, prenatal and early years periods

**This event has been organized by the Middlesex-London Healthcare Provider Champion Committee in partnership with Middlesex London Health Unit, with special thanks to:**

Dr. Henry Roukema  
Dr. Laura Lyons
