		Total	\$ 527,289.00	3.50	3184
		l .		l	1

Investment Descriptions

1-0005 - MLHU Wellbeing

This proposal expands the work that was started in 2015 with committed funding towards MLHU Employee Wellbeing on a permanent basis. In order to accomplish the HU mission of promoting and protecting the health of our community we need to be promoting and protecting the health of our employees who are responsible for helping the organization to achieve this mission. In addition to aligning with our organizational values, this proposal also aligns with our Strategic Plan, in particular, the Employee Engagement and Learning Quadrant with the objective of strengthening positive organizational culture.

1-0006 – Data Analyst Enhancement

Health status and surveillance data as well as findings from applied public health research are key sources of evidence to inform planning and evaluation. This proposal would add Data Analyst support to increase the internal organizational capability to create and process data. The expansion of this role will also help the intended outcome of supporting analysis for organization-wide strategic projects and engaging in public health applied research.

1-0008 – Data Enabled Cell Phones for MLHU Staff

Health Unit staff have the need and the capacity to utilize data-enabled cell phones to increase efficiency and productivity in their day-to-day work. The MLHU contract for cell phones is up for renewal in June 2016, allowing for the negotiation of data-enabled cell phones for staff. Initial support may be requested from the MLHU Information Technology (IT) department for set up and training on the use of new devices. Criteria will be developed to determine which staff will be prioritized for data-enabled devices.

1-0048 - Living Wage Employer Certification

This proposal would allow the organization to become designated as a Living Wage Employer, increasing the health equity impact of Health Unit programs, establishing the Health Unit as a leader in this area, and enhancing the Health Unit's ability to influence others to take on Living Wage policies.

1-0003 – In Motion Physical Activity Community Challenge

This proposal requests ongoing funding to support and promote the In Motion Physical Activity Challenge. We partner with Middlesex County and the City of London in discussions with media, confirmation and purchasing of media sites, purchasing of promotional materials, updating of the in Motion website, updating and printing of all print materials, discussion with stakeholders and Champions and recruitment of new partners to further expand the reach of the Challenge to build community capacity.

1-0022 - Nicotine Replacement Therapy Supply and Distribution for Priority Populations

This proposal intends to increase the capacity of the Health Unit to be able to purchase the required nicotine replacement therapies to meet the need of priority populations within the Middlesex-London area. We project that for 2016 we require an additional ongoing \$54,000 investment to support the agency-wide purchase and distribution of NRT to cover the shortfall due to the lack of Ministry grant funding. Other costs of cessation service delivery, and pharmacy administration across the Health Unit has been integrated into program budget operating expenses.

1-0050 - Smoke-Free Ontario Inflationary Pressures Enhancement

Inflationary pressures and increased costs due to negotiated wages and benefits require a budget enhancement of \$5,400 to meet program budgetary needs and to maintain current service levels.

1-0010 - Program Planning and Evaluation Support

The proposed change is the addition of 1.0 FTE permanent program evaluator to the Family Health Service Epidemiology / Program Evaluation team. The impact will be additional support for program planning and evaluation by providing support to logic model development for programs, conducting needs assessments, evaluations and enhancing evidence-informed decision making. These resources also contribute to building capacity and a culture of program planning and evaluation in FHS.

1-0019 – Healthy Babies Healthy Children and Infant Hearing Screen at London Health Sciences Centre

This proposal is requesting an investment to fund Public Health Nurses (PHNs) to complete both the Healthy Babies Healthy Children (HBHC) and the Infant Hearing Screening together with postpartum families at the London Health Sciences Centre (LHSC) on weekdays, weekends and Statutory Holidays.

1-0051 – Healthy Babies Healthy Children Inflationary Pressures Enhancement

Inflationary pressures and increased costs due to negotiated wages and benefits require a budget enhancement of \$37,500 to meet program budgetary needs and to maintain current service levels.

1-0007 – Program Assistant Support for Sexual Health Team

This proposes that a Program Assistant would be available to support Sexual Health Programming at MLHU for an additional 0.1 FTE, to bring the PA support for the team to a total of 0.5 FTE. This proposed enhancement would benefit MLHU's Sexual Health Programming in a number of ways, and will result in greater effectiveness and efficiencies for the Sexual Health Promotion Team and the Sexual Health Team manager.

1-0025 - Program Assistant Support for the Oral Health Team

The Oral Health Team is requesting an investment of 0.5 FTE Program Assistant support. It is expected that this proposal will enable the team to continue to effectively and efficiently provide programs and services to our community. This position will support the Oral Health team to follow up on clients of the school-based dental screening program by completing clients' records, corresponding with parents/guardians, and preparing documentation for Children's Aid Society (CAS) referrals. The PA will support the dental clinic team to schedule appointments, oversee inventory and equipment maintenance, and maintain records (logs).

1-0040 – Funding Support for the Counterpoint Needle Exchange Program at Regional HIV/AIDS Connection

This proposal would allow the Health Unit to maintain service provision at current levels. Services specific to Counterpoint Needle Exchange Program would continue to be provided by RHAC, but would be funded by MLHU rather than by RHAC's other funding sources on an in-kind basis. Resources in this proposal would also result in an increase in service, specifically the provision of weekend needle exchange outreach services.

1-0047 – Associate Medical Officer of Health Enhancement

The Associate Medical Officer of Health (AMOH) position includes leadership roles in implementing evidence-based practices and ensuring delivery of quality programs. Currently, there is a high demand for these roles, including needs that sometimes go unmet due to limited AMOH time (0.8 FTE). This demand will be increasing with the implementation of the new strategic plan. There is also a need to have full-time backup for the MOH. This proposal would increase the AMOH role from 0.8 FTE to 1.0 FTE.

The Business Case for Paying a Living Wage

"Living wage" refers to an hourly wage that allows employees and their families to meet their basic needs. Living Wage policies have been in place since the mid 1990s and are now working in some 140 municipalities and counties in the United States, including Boston, Detroit, Chicago, Los Angeles and New York City, as well as in many cities in the UK. In 2010, the City of New Westminster, B.C., became the first Canadian municipality to enact a comprehensive Living Wage policy, while many private employers are signing up to become Living Wage Employers throughout Canada.

There is now a large body of research which documents the positive economic and social effects of paying a Living Wage. There are many obvious benefits to workers who receive a living wage, especially when it boosts working poor people and their families out of poverty. But what does living wage mean for employers?

1. Decreased employee turnover; cost savings for staff hiring and training

- A study of employers in Los Angeles found lower rates of labour turnover, absenteeism and overtime rates and higher rates of training amongst 75 living wage contractors when compared to 210 similar non-living wage firms. Staff turnover rates at firms covered by living wage polices averaged <u>17% lower</u> than at firms that were not (Fairris and Reich 2005).
- A leading <u>study</u> of the San Francisco airport by researchers at the University of California found that after the airport boosted wages, turnover among contracted security screeners <u>plummeted from 95% to 19%</u> as their hourly wage rose from \$6.45 to \$10.00 an hour. The airport saved thousands of dollars per worker in new employee recruitment and training costs (Reich, Hall and Jacobs 2005).
- In 2004, Barclays Bank in London specified that its cleaning contractees in Canary Wharf provide a better pay and benefits package that included pension contributions, sick pay, bonuses, an increased holiday entitlement and training to an industry recognized standard. Barclays deemed the increased costs to be completely commercially viable by attracting higher quality employees and improving cleaning standards. Indeed, the new policy resulted in a dramatic drop in absenteeism and turnover, from 30% to 4%, along with rising performance and customer satisfaction levels. In 2007, Barclays expanded the living wage rate for cleaners to all its City offices (cited in SERTUC, n.d.: 6).
- KPMG London <u>halved its turnover rate</u> after it introduced a living wage policy for all its in-house and contract staff. Other benefits were seen as well: "No one abused the new sick pay scheme and absenteeism is very low. We get the benefit of reduced training costs and increased staff continuity. It is a much more motivated workforce" Head of Corporate Services, Guy Stallard (cited in SERTUC, n.d.: 6).
- A Harvard Business Review <u>article</u> found that wholesale retailer Costco's higher wage rate than other retailers resulted in less turnover. Turnover is unusually low, at <u>17% overall</u>, <u>compared to 44%</u> a year at Wal-Mart which is close to the industry average. The study also found greater productivity and lower levels of employee theft at Costco (Cascio 2006).

2. Improved job quality, productivity and service delivery; lower absenteeism

- More than 80% of employers involved in the London Living Wage Program (LLW) believed that the LLW had enhanced the quality of the work of their staff.
 Employees (almost 75%) also reported increases in work quality as a result of receiving the LLW. (London Economics, 2009)
- In the aforementioned San Francisco Airport <u>Study</u>, after the airport implemented a Living Wage Policy, quality improved dramatically, as did morale: <u>35%</u> of employers reported improvements in work performance, <u>47%</u> reported better employee morale, <u>44%</u> reported fewer disciplinary issues, and <u>45%</u> reported that customer service had improved (Reich, Hall and Jacobs 2005).
- An investigation of the decision by Queen Mary University of London to bring its cleaning service in-house and become a living wage employer found that it stimulated improvements in job quality, productivity and service delivery, with very little increase in costs (Wills, Kakpo and Begum 2009).
- The state of Maryland found that encouraging living wages boosted competition for state contracts by expanding the pool of "good" firms that could compete on a level playing field (cited in Los Angeles Times editorial, July 6, 2010).

3. Benefits the broader economy by stimulating consumer spending

- A 2009 Goldman Sachs report confirms that increasing the income of people with lower wages has a <u>proportionately larger stimulating effect on the economy</u> than increasing the income of those on high incomes. Low earners tend to spend more of their increased income than those on much higher incomes, because those on low-incomes have more essential spending needs to be met by any income increases. Higher income populations deliver only 3-5 cents increased spending per additional dollar of wealth (Goldman Sachs 2009).
- A 2008 study by economists at the Federal Reserve Bank of Chicago, which
 examined 23 years of household spending data, found that an increase in the
 minimum wage leads households with a minimum wage worker to significantly
 increase their spending over the next year: for every dollar increase in the
 minimum wage, families with minimum-wage workers tend to increase spending
 by more than \$800 per guarter (Aaronson et al. 2008).
- Vancity emphasized the positive role that living wages play in the local economy when they agreed to become a Living Wage Employer in 2011 "We want to be part of a community that invests in the long-term prosperity of individuals and the economy. Paying a living wage to our employees and service providers will help make families stronger and communities healthier." Tamara Vrooman, President and Chief Executive Officer, Vancity

4. Greater corporate social responsibility and firm reputation

 Private firms are becoming increasingly aware that commitment to corporate responsibility is essential to their public image. Private companies and public institutions are conscious of their "brand" image, but lofty mission statements mean little if the public becomes aware that they hide the exploitation of low paid staff.

- 70% of employers involved in the London Living Wage Program (LLW) felt that being publicly recognized as paying a Living Wage had increased consumer awareness of their organization's commitment to be an ethical Employer
- A statement from KPMG London on why they became a Living Wage Employer states: "Research suggests that most people want to work for a company whose values are consistent with their own and that a majority of young people believe in the power of responsible business practice to improve profitability. Thus corporate responsibility is increasingly a key factor in attracting and retaining a talented and diverse workforce. Our last annual People Survey showed that almost all of our people believe KPMG is socially responsible and makes a positive contribution to the communities in which we operate."
- Being a service contractor who pays a living wage helps gain recognition from large firms and public bodies who have developed ethical purchasing policies as part of their contracting process.
- Eclipse Awards, a Living Wage Employer based in Strathcona, Vancouver has been nominated as a Top 10 Finalist for Best Employer in BC in 2011 partly because of their pioneering commitment to being a Living Wage Employer.
- Being able to advertise that you pay a living wage satisfies the growing consumer demand for ethical consumption (Turcotte 2010)

2016 Proposed PBMA One-time Investments

Dept.	No.	Proposal	Value	FTE	Score
Cross-	1-0032	Nurse Family Partnership	\$ 35,000.00	0.00	286
MLHU					
Cross-	1-0001	Mental Health and Wellbeing	\$ 36,953.00	0.50	285
MLHU		Promotion Strategy			
Cross-	1-0012	Leadership and Management	\$ 40,000.00	0.00	201
MLHU		Development Program			
EHCDP	1-0021	Increasing Food Systems Capacity	\$ 45,000.00	0.50	224
OHCDSH	1-0024	Public Health Nurse for Tuberculosis	\$ 50,000.00	0.50	265
		Total	\$ 206,953.00	1.50	1261

One-time Investment Descriptions

1-0032 - Nurse Family Partnership

This PBMA investment would provide the funds necessary to allow nurses and nurse supervisors to receive the NFP training and cover associated travel costs and start up licensing fees. \$350,000 from the Local Poverty Reduction Fund has also been received to help cover the costs associated with developing a Canadian training model and researching the training and determining the impact of NFP in Ontario.

1-0001 – Mental Health and Wellbeing Promotion Strategy

This proposal requests a temporary 0.5 FTE Program Evaluator for 2016 to conduct a literature review on evidence-based strategies to promote connectedness throughout the lifespan. This will enable the Health Unit to develop a comprehensive mental health well-being strategy with specific outcomes and indicators.

1-0012 - Leadership and Management Development Program

The Leadership & Management Development Program seeks to develop the skills and expertise of the Health Unit management team and provide ongoing workforce development. This initiative is aimed at directly addressing one of the top five least favourable categories as identified by employees in the 2014 engagement survey around managing performance and continues to be ongoing area of concern.

1-0021 – Increasing Food Systems Capacity

This proposal would continue a previous PBMA investment that increased the capacity of the Health Unit by 0.5 FTE Registered Dietitian/Public Health Dietitian so that MLHU is better positioned to take an ecological approach - addressing the environmental, economic, social and nutritional factors - to impact food-related issues in our communities, including food insecurity, consumption of nutrient-poor foods, rates of overweight/obesity and related chronic diseases.

1-0024 – Public Health Nurse for Tuberculosis

Despite the Infectious Disease Control Team's workload redistribution process, further Public Health Nurse (PHN) time dedicated to tuberculosis (TB) clinics is needed. Unfortunately, the current complement within the team does not allow for further nursing time to be committed to TB without this enhancement

2016 Proposed PBMA Disinvestments

Dept.	No.	Proposal		Value	FTE	Score
EHCDP	1-0027	Adjusting Vector Borne Disease Budget to Reflect Current Status	-\$	40,801.00	0.00	0

ОМОН	1-0046	Modify Executive Assistant to the Board of Health and Program Assistant to Communications	-\$	10,000.00	-0.20	0
		Total	-\$	291,597.00	-2.60	-436

Disinvestment Descriptions

1-0027 - Adjusting Vector Borne Disease Budget to Reflect Current Status

The Vector Borne Disease (VBD) program delivery has evolved and changed significantly over the last several years with no corresponding re-evaluation of the allocation of budget funds. Some aspects of the VBD program are currently being funded from other cost-shared budget lines and the budgets should be adjusted to more accurately reflect our actual program delivery and spending practices.

1-0029 - Proper Allocation for Program Assistant for E-Cigarette Act

Tobacco program requirements continue to increase in particular with the introduction of the new ecigarette Act and the monitoring and enforcement requirements. Additional Program Assistant (PA) time will be required to manage the workload. The current number of PA staff is sufficient to manage the workload along with the addition of further tobacco monitoring, enforcement, paperwork and programming allowing 0.5 FTE cost shared salary dollars for a PA in EHCDP Service Area to be replaced by 0.5 FTE Smoke-Free Ontario 100% dollars.

1-0034 – Health Connection and Early Years Team Program Assistant Reduction

This proposal reduces Program Assistant support for Health Connection and the Early Years Team by 0.50 FTE. This would be done by redirecting calls that do not require public health nursing to free up 0.25 FTE from Health Connection and reducing general support capacity on the Early Years Team by 0.25FTE.

1-0035 – Decrease Operations Budget from Family Health Services Administration

The administrative (or central budget for FHS) will decrease the purchase of material and supplies and program resources but will have no impact on service delivery. Each team has their own budget line.

1-0036 - Decrease Casual Public Health Nursing Budget

This proposal decreases the casual budget by \$15,000 for prenatal teachers. There has been an efficiency gain in how prenatal classes are being delivered. An online e-learning component has been added that reduces facilitated in-class nursing time. This results in less casual and/or contract nurse time required to facilitate prenatal classes.

1-0037 - Reproductive Health Team Program Assistant Reduction

The Reproductive Health Team is proposing to reduce the program assistant FTE allocation from 2.5 to 2.0 FTE due to a shift in graphic design work being completed by external graphic professionals, rather than by internal program assistants, communication campaigns are relying more heavily on electronic venues and presentations offered by PHN's on the team are now developed by the PHN's themselves.

1-0038 - Breast Pump Loan Program

Based on the evidence demonstrated in the literature review, and a chart audit which demonstrated that loaning electric breast pumps was only effective in maintaining breast feeding for 14% of mothers who used Healthy Babies Healthy Children, we intend to tighten the criteria for the breast pump loan program and decrease costs by \$5,000. This will enable PHNs to provide breastfeeding support to the mothers who will benefit most from the loan of an electric breast pump, while still supporting breastfeeding mothers overall.

1-0039 – Let's Grow Reduction

This proposal eliminates 0.4 FTE of a Program Assistant which will no longer allow for registrants of the Let's Grow program to receive e-alerts. The program information will be sustained and there will be a need to find other strategies that will direct parents to the MLHU Let's Grow website newsletters to access the issues appropriate to their child's stage of development. Administrative duties over and beyond entry of registration into the database and sending emails will need to be integrated into the Early Years Team.

1-0041 - Community Mobilization of Developmental Assets

This proposal reduces 0.5 FTE of a Public Health Nurse (PHN) assigned to the Community Mobilization component of the Search Institute's Developmental Asset Framework. Due to incompatibility between the trademarked Developmental Asset framework and MLHU's mandate, the program will not be implemented by MLHU in Middlesex-London. Evidence-informed strategies to achieve the intended outcomes will continue in its place.

1-0043 - Reduction of Casual Reception Administration Budget

This budget line was initially introduced in order to fund casual staffing including but not limited to the backfilling of reception staff in the Strathroy office. Although there still exists a need to backfill reception in London on occasion (vacation, sick, in-service meetings, etc.) this budget amount can be reduced due to the elimination of the Strathroy reception.

1-0042 – Eliminate Involvement in Dental Claims Administration

There are a number of ministry changes that will impact the Oral Health team – specifically the move to 3rd party dental claims administration. With the move to HSO 2.0, health units will no longer be responsible for dental claims submission and this proposal would allow for a 0.2FTE reduction in Dental Consultation support.

1-0028 - Reduce Casual Public Health Nursing in the Sexual Health Clinic

A program review of Sexual Health Clinic Services was completed in 2015 with recommendations identified. One of the recommendations is to change the scope of the clinic to align more completely with our public health mandate. It is anticipated that this change will reduce the number of clients accessing service in our family planning clinics and as a result, there is less need for casual PHN support in the clinic.

1-0021 – Modify the Executive Assistant to the Board of Health and Program Assistant for Communications Roles

Administrative support work for the Communications program handles sensitive and confidential information, and has in the past provided ad hoc coverage to the Executive Assistant (EA) to the Medical Officer of Health (MOH). This position needs to be able to work at a high level and partner with the EA to the MOH in a more formal and deliberate way. This proposal would create a new administrative position that supports both the Board of Health and the Communications program, and eliminate the Executive Assistant to the Board of Health and Program Assistant to Communications positions. Combining these two positions would address these issues. Additional support time would be reallocated to part-time Program Assistant staff.
