

MEMO: Update on Regional Prioritization of COVID-19 Vaccine

March 10, 2021

Huron Perth Public Health, Middlesex-London Health Unit, and Southwestern Public Health will provide regular updates on the eligibility criteria for recipients of the COVID-19 vaccine in their respective regions.

The Ministry of Health, through the guidance of the provincial COVID-19 Vaccine Task Force, prioritizes and directs the allocation of the vaccine. To ensure fairness across the province, local jurisdictions must adhere to the provincially determined sequence of recipients.

Periodically, vaccine supply differs by region and additional prioritization is necessary. In these instances, a regional **COVID-19 Vaccine Prioritization Advisory Committee** has been struck to help inform the public health units' decisions regarding further prioritization when necessary. For more information on the COVID-19 Vaccine Prioritization Advisory Committee, please visit the Middlesex-London Health Unit website at <https://www.healthunit.com/covid-19-vaccine-prioritization>. Eligibility will be reviewed weekly and will be dependent on vaccine supply and Provincial direction.

Current Provincial Direction on Prioritization

The province has indicated that vaccine supply can be expanded, dependent on regional supplies, to the remainder of the Phase One populations. Specifically regarding health care workers, the province provides direction through the [Guidance for Prioritizing Health Care Workers for COVID-19 Vaccination](#).

Regional Update

Short-term vaccine supply will continue to be less than the number of eligible recipients in the Phase One population. Therefore, further regional prioritization is required.

When possible, Huron Perth Public Health, Middlesex-London Health Unit, and Southwestern Public Health will strongly consider age in determining the sequence of COVID-19 vaccine recipients. This is consistent with the province's ethical framework to guide COVID-19 vaccine prioritization and distribution decisions. The core principles include the objective of minimizing harms and maximizing benefits by reducing overall illness and death related to COVID-19. Amongst those infected with the SARS-CoV-2 virus, age is the single most predictive risk factor for death; in Ontario, [87% of COVID-19 associated deaths](#) have occurred in those over the age of 70. To reduce the number of deaths in the province, prioritizing the immunization of older individuals will be critical.

Eligibility criteria in the region are described below.

ELIGIBLE FOR BOOKING AN APPOINTMENT FOR A FIRST-DOSE

The following people are eligible to receive the first dose of the vaccine. Where a health sector has been named in the priority sector, all frontline workers in that sector are included (e.g., including students, registered volunteers, custodial, security and reception staff). Where a non-health setting has been named, only workers providing a health service or direct patient care are included.

Residents, staff, and essential caregivers associated with long-term care and retirement homes

- Long-term care and retirement home residents.
- Long-term care and retirement home staff.
 - Includes LHIN, Hospital, Primary Care and Paramedic Services staff who are directly providing on-site support to LTCH and RHs in outbreak and have committed to a week or more of attending the facility.
- Essential caregivers in long-term care and retirement homes
 - A caregiver is a type of essential visitor who is designated by the resident and/or their substitute decision-maker and is visiting to provide direct care to the resident.
- Alternative level of care patients in hospitals who have a confirmed admission to LTCH, RH, or other congregate care home for seniors, as operationally feasible.

Hospital and acute care health care workers in frontline roles with COVID-19 patients and/or with a high-risk of exposure to COVID-19. These individuals should be regularly scheduled staff (full time or part time) and not transient workers. The staff must be drawn from the following areas:

- Critical Care Units
- Emergency Departments and Urgent Care Departments
- COVID-19 Medical Units
- Code Blue Teams and rapid response teams
- General internal medicine and other specialists involved in the direct care of COVID-19 positive patients

Patient-facing health care workers involved in the COVID-19 response:

- COVID-19 Assessment Centers, including Mobile Testing Teams
- COVID-19 vaccine clinics and mobile immunization teams
- COVID-19 Isolation Centers
- COVID-19 Laboratory Services

Medical First Responders

- ORNGE, paramedics, firefighters and police providing medical first response

ELIGIBLE FOR BOOKING AN APPOINTMENT FOR A FIRST-DOSE - CONTINUED

Patient-facing community health care workers serving specialized populations including:

- Needle exchange/syringe programs & supervised consumption and treatment services
- Aboriginal Health Access Centers, Indigenous Community Health Centers, Indigenous Interprofessional Primary Care Teams, and Indigenous Nurse Practitioner-Led Clinics
- Community Health Centers serving disproportionately affected communities and/or communities experiencing highest burden of health, social and economic impacts from COVID-19
- Home and community care health care workers caring for recipients of chronic homecare and seniors in congregate living facilities or providing hands-on care to COVID-19 patients.

Frontline healthcare workers working in hospital inpatient settings and hospital procedural areas, including surgical care, anesthesia, obstetrics, endoscopy, operating rooms, dialysis, imaging, chemotherapy, and radiotherapy.

Residents and staff in other congregate care settings for seniors, including assisted living facilities.

Adults 80 years of age and older.

Indigenous adults 55 years of age and older.

- Eligible individuals must self-identify as Indigenous when presenting at clinic.

Indigenous adults 16 years of age and older living on-reserve.

Adults 16 years of age and older who are chronic home care recipients. *NEW*

Frontline healthcare workers in the following outpatient and ambulatory areas: *NEW*

- Hospital-based outpatient clinics
- Primary care, including walk-in clinics, community health centres, and nurse-practitioner-led clinics
- Home and community care
- Adult day programs for seniors
- Community Based Specialty clinics, including medical and surgical specialties
- Death investigation professionals
- Dentistry
- Gynecology/obstetrics, midwifery, and birth centres
- Contract nursing agencies
- Pharmacies
- Assisted living, group homes, residential facilities, supportive housing
- Correctional settings
- Hospices and palliative care settings
- Shelters

Laboratory services. *NEW*

ELIGIBLE FOR END-OF-DAY DOSES

At the end of each clinic, there may be a small amount of additional vaccine available that is to be used to avoid wastage. Clinic operators should develop a plan for ensuring that the following groups are available for end-of-day doses, in the following order of preference:

- Individuals eligible for a first-dose who can present to the clinic within 30 minutes.
- Individuals eligible for second-dose who can present to the clinic within 30 minutes.
- Healthcare workers who are soon to be eligible, have pre-registered, and can present to the clinic within 30 minutes.

SECOND-DOSE SCHEDULE

Consistent with provincial direction and to maximize the number of individuals benefiting from a first dose of vaccine, the second dose of vaccine will be delayed for most recipients.

Given the scarce vaccine supply, the Province has directed the following:

- All second doses for residents of long-term care, retirement and First Nations elder care homes will continue to be delivered at the initial intervals described in the product monographs.
- All second-doses for all other groups will be scheduled at 112 days after their first dose.

SOON TO BE ELIGIBLE

The following individuals are not yet eligible for the vaccine in this region, including:

- Healthcare workers not explicitly listed in the eligible groups, including those working in the following areas:
 - Developmental services
 - Mental health and addictions services
 - Campus health
 - Community diagnostic imaging
 - Daycare/school nursing
 - Dietary / nutrition
 - Independent health facilities (e.g., Opticians/Optomety, Podiatry, Audiology)
 - Naturopathy / Holistic care
 - Social work clinics
 - Sexual health clinics
 - Chiropractic
 - Chronic pain clinics
 - Kinesiology
 - Occupational therapy
 - Physiotherapy
 - Psychiatry
 - Psychology
 - Psychotherapy
 - Registered massage therapy
 - Acupuncture
 - Public health
 - Non-Frontline health care workers (e.g., those working remotely, in administration, and who do not require PPE to work).
