

OUTBREAK STATUS REPORT

Middlesex-London Health Unit

Last Updated: February 8, 2023 4:12 PM

For more information or to report an outbreak, contact:
 The Infectious Disease Control Team
 Middlesex-London Health Unit
 519-663-5317 ext. 2330

Active

Premise	Type of Outbreak	Date Declared	Affected Area(s)	Date Resolved	Pathogen 1	Pathogen 2	Pathogen 3
Oneida Long Term Care Home	Respiratory	Feb 8, 2023	West/Bear Unit		COVID-19		
Chelsey Park LTC	Respiratory	Feb 8, 2023	3rd floor		COVID-19		
LHSC- University Hospital	Respiratory	Feb 6, 2023	U7		COVID-19		
Peoplecare Oak Crossing	Respiratory	Feb 6, 2023	Sugar Maple, Red Oak, Juniper		Rhinovirus		
Chartwell Parkhill	Enteric	Feb 5, 2023	Town wing		Unknown		
Extendicare	Enteric	Feb 3, 2023	Facility-wide		Unknown		
Kensington Village Retirement	Respiratory	Feb 1, 2023	TCU - Thames		COVID-19		
Chartwell London	Respiratory	Jan 31, 2023	Aspen Unit		COVID-19		
Strathmere Lodge	Respiratory	Jan 31, 2023	Bear Creek		COVID-19		
Amica London	Respiratory	Jan 30, 2023	5th Floor		RSV		
Extendicare	Respiratory	Jan 27, 2023	1st Floor		COVID-19		
Dearness Home	Respiratory	Jan 26, 2023	1E, 2W		COVID-19		
Village of Glendale Crossing	Enteric	Jan 25, 2023	Glanworth, Pondmills, Lambeth		Unknown		
Chartwell Royalcliffe Retirement Residence	Enteric	Jan 23, 2023	4th & 6th floor		Unknown		
Arbor Trace Alzheimer's Special Care Center	Enteric	Jan 23, 2023	Facility wide		Unknown		
Sprucedale Care Centre	Respiratory	Jan 22, 2023	Cedar unit		COVID-19		
Middlesex Terrace	Respiratory	Jan 19, 2023	Facility wide		RSV	Parainfluenza	
Highview Residence - Franklin House	Respiratory	Jan 17, 2023	Constable Cottage		COVID-19		
Craigwiel Gardens	Respiratory	Jan 16, 2023	Facility-wide		Human metapneumovirus	COVID-19	
Elmwood Place	Respiratory	Jan 9, 2023	Victoria		RSV		
Chartwell London	Enteric	Jan 3, 2023	Pinebrook Unit, Aspen Unit		Unknown		

Declared Over

Premise	Type of Outbreak	Date Declared	Affected Area(s)	Date Resolved	Pathogen 1	Pathogen 2	Pathogen 3
McGarrell Place	Respiratory	Jan 17, 2023	Lawson Lane	Feb 7, 2023	COVID-19		
Peoplecare Oak Crossing	Respiratory	Jan 6, 2023	White Pine	Feb 7, 2023	COVID-19		
Parkwood Institute Mental Health Care Building	Respiratory	Jan 25, 2023	G2 Mental Health	Feb 5, 2023	COVID-19		
Longworth Retirement Residence	Respiratory	Jan 31, 2023	2nd floor	Feb 4, 2023	COVID-19		
Westmount Gardens	Respiratory	Jan 30, 2023	Iris Unit	Feb 4, 2023	Coronavirus (not COVID-19)		
Parkwood Institute Main Building	Respiratory	Jan 27, 2023	5B South	Feb 4, 2023	COVID-19		
LHSC- University Hospital	Respiratory	Jan 20, 2023	U8 General Surgery	Feb 4, 2023	COVID-19		
McGarrell Place	Respiratory	Jan 19, 2023	Windermere Way	Feb 4, 2023	RSV		
Parkwood Institute Main Building	Respiratory	Jan 27, 2023	4A North	Feb 3, 2023	COVID-19		
Maple View Terrace	Respiratory	Jan 10, 2023	6th floor	Feb 2, 2023	RSV		
Henley Place LTC Residence	Respiratory	Jan 1, 2023	Medway	Feb 2, 2023	RSV		

This information is to be used as a guide and is intended to help you prevent infections and outbreaks in your facility. The decision regarding who can work at a facility rests with that facility, but should take into account the need for adequate staffing levels and the risk of infection from staff working at multiple facilities. For more information please visit <https://www.healthunit.com/outbreak-resources>

Enteric Outbreaks

- Staff members/volunteers from facilities in outbreak should not work at your facility until at least 48 hours have elapsed since they last worked at the affected facility. This period can be modified if the causative agent is known.
- Staff members/volunteers who are experiencing gastrointestinal illness should not work at any facility until they have been symptom-free for at least 48 hours. Good hand hygiene should be reinforced with returning staff members/volunteers.
- Staff should change to a clean uniform between facilities and before leaving the affected facility.

(Source: Control of Gastroenteritis Outbreaks in Long-Term Care Homes: A Guide for Long-Term Care Homes and Public Health Unit Staff, 2013). <https://www.healthunit.com/outbreak-resources>

Clostridium difficile Outbreaks

- Provided that all required infection control practices are in place, staff can work at both affected and unaffected facilities without restrictions.

Residents/patients with suspected or confirmed *Clostridium difficile*-associated diarrhea (CDAD) can be transferred within the health care system; however, the receiving facility must be notified and be able to comply with the recommended infection control precautions. *Clostridium difficile* is suspected in a resident/patient who develops diarrhea and has been in a facility experiencing a *Clostridium difficile* outbreak. Initiate Isolation rapidly and stool samples should be collected. **(Source: Annex C: Testing, Surveillance and Management of Clostridium difficile In All Health Care Settings, January 2013).**

Respiratory Outbreaks (non-influenza)

- Staff members/volunteers from facilities in outbreak should not work at your facility until at least 72 hours have elapsed since they last worked at the affected facility. For outbreaks attributable to Respiratory Syncytial Virus (RSV), Parainfluenza virus, Human metapneumovirus, and Adenovirus consider lengthening this time period to 5 days. Staff members/volunteers who are experiencing respiratory symptoms should not work at any facility until 5 days from onset of symptoms or until symptoms have resolved. For outbreaks attributable to RSV, lengthen this time period to 8 days. Good hand hygiene should be reinforced with returning staff members/volunteers. **(Source: A Guide to the Control of Respiratory Infection Outbreak in Long-Term Care Homes, Ministry of Health and Long-Term Care, November, 2015).** http://www.health.gov.on.ca/en/pro/programs/publichealth/flu/docs/resp_infectn_ctrl_guide_ltc_2015_en.pdf

Influenza Outbreaks

- The Health Unit recommends that you ask non-immunized staff/volunteers who are from facilities in outbreak, and who are not on an appropriate antiviral drug, to refrain from working at your facility until it has been at least 72 hours since they last worked at the affected facility.
- Staff members/volunteers who are experiencing respiratory/ influenza symptoms should not work at any facility until 5 days from onset of symptoms or until symptoms have resolved, whichever time period is shorter. Good hand hygiene should be reinforced with returning staff members/volunteers. **(Source: A Guide to the Control of Respiratory Infection Outbreak in Long-Term Care Homes, Ministry of Health and Long-Term Care, November, 2015).** http://www.health.gov.on.ca/en/pro/programs/publichealth/flu/docs/resp_infectn_ctrl_guide_ltc_2015_en.pdf
