

Summary of the Ontario Publicly Funded Immunization Schedule for Children Starting Immunization in Infancy

Date issued: July 2020

NOTE: CHILDREN ARE REQUIRED TO BE UP TO DATE FOR THEIR AGE TO ATTEND CHILD CARE AND SCHOOL

Age	Vaccines to be given	Route for Administration
2 months	DTaP-IPV-HIB (PediaceL) Pneumococcal Conjugate 13 (Pevnar-13) Rot-5 (RotaTeq)	IM – vastus lateralis (leg) IM – vastus lateralis (leg) Oral
4 months	DTaP-IPV-HIB (PediaceL) Pneumococcal Conjugate 13 (Pevnar-13) Rot-5 (RotaTeq)	IM – vastus lateralis (leg) IM – vastus lateralis (leg) Oral
6 months	DTaP-IPV-HIB (PediaceL) Rot-5 (RotaTeq)	IM – vastus lateralis (leg) Oral
12 months	MMR (MMRII, Priorix)* Meningococcal Conjugate C (Neis-Vac-C, Menjugate)** Pneumococcal Conjugate 13 (Pevnar-13)	SC – upper outer tricep area IM – deltoid IM - deltoid
15 months	Varicella (Varivax III, Varilrix)*	SC – upper outer tricep area
18 months	DTaP-IPV-HIB (PediaceL)	IM - deltoid
4-6 years	MMRV (Priorix-Tetra, ProQuad)* Tdap-IPV (Adacel-Polio, Boostrix-Polio)***	SC – upper outer tricep area IM - deltoid
11-12 years (given in school in Grade 7)	Hepatitis B (Engerix, Recombivax) (1.0 ml dose) HPV-9 (Gardasil 9) Meningococcal Conjugate ACYW-135 (Menactra)	IM - deltoid (2 doses, 6 months apart) IM - deltoid (2 doses, 6 months apart) IM - deltoid
10 years after Tdap-IPV	Tdap (Adacel, Boostrix)	IM – deltoid

* All live vaccines must be given **on or after** the 1st birthday (MMR, Varicella, MMRV). The minimum spacing between live vaccines is 4 weeks except when BOTH vaccines contain varicella, when the minimum spacing is 6 weeks.

** Men-C-C vaccine must be given **on or after** the 1st birthday.

*** Tdap-IPV (5th dose of these antigens) must be given **on or after** the 4th birthday.

CONSULT THE FULL *PUBLICLY FUNDED IMMUNIZATION SCHEDULES FOR ONTARIO* FOR MORE INFORMATION ON DOSING, SPACING, CATCH UP SERIES AND OTHER VACCINE REQUIREMENTS.

THE PUBLICLY FUNDED SCHEDULE IS SUBJECT TO CHANGE AT ANY TIME.
